37

REGION

Ghent - Brussels

PROFILE

Programming has been a hobby since I was a child and at my previous jobs, I enjoyed automating tasks with Python and VBA. So, after 10+ years of work experience in different fields I decided to make the career switch to full-stack developer.

During BeCode's 7 month long junior full-stack developer bootcamp I learned many technical skills by working on solo projects but also collaborating with other students on group projects using Git.

PERSONAL SKILLS

- ✓ ATTENTION TO DETAIL
- ✓ CRITICAL MINDSET
- ✓ EFFICIENT
- ✓ HIGH LEARNING ABILITY
- ✓ HIGH PRODUCTIVITY
- ✓ OUT-OF-THE-BOX THINKER
- ✓ PROBLEM SOLVING
- ✓ STRONG ANALYTICAL SKILLS

LANGUAGES

EDUCATION

- 2025 Junior Full-Stack Developer
BeCode
- 2007 Informatics Management
SMI Aalst

TRAINING

- 2023 **Harvard school - CS 50p Python**
Introduction Python development including 10 chapters and aligned projects.

Training Projects

Weather app

A web application that displays real-time weather information for any city using the Open-Meteo API. Built with HTML, CSS and JavaScript, it allows users to dynamically add location cards. Each card automatically fetches a relevant background image from Wikipedia when available, creating a more engaging and visually appealing experience.

Frontend: HTML/CSS/JavaScript

Todo app

A task management application that allows users to create, update, and delete tasks.

Frontend: HTML/CSS/JavaScript

Backend: Java/PostgreSQL

Recipes & food supply app

A web application for managing recipes and tracking food inventory. Users can save, search, and organize recipes while monitoring available supplies. The backend includes user authentication to protect personal data and offer a personalized experience.

Frontend: HTML/CSS/JavaScript

Backend: PHP/MySQL
